

Terry Jarrard

Simpler, doesn't always mean easier.

BASED
Eastern Oklahoma

FEE RANGE
Contact me, let's talk!

Terry and Tracey Jarrard of TnT Homesteading live full time, completely off-grid, on 10 wooded acres in Eastern Oklahoma. They bought the land in 2020 and moved there full time in 2023, turning a small shack into a home. Terry started their solar setup in 2021 with four 200-watt panels and two marine batteries. He has grown it step by step since then, including expanding the battery bank by 50 percent to 600 amp-hours and adjusting the panel angles each season. In five years of hands-on work, they've also put gutters on five buildings feeding 1,290 gallons of rainwater storage, installed gravity drip irrigation, and raised chickens and gardens on land they share with the local wildlife. Their motto is "Simpler doesn't always mean easier." Terry speaks on off-grid living and solar power at homestead conferences, including the New Beginnings Homestead Expo and the Oklahoma Homestead Rendezvous. He also offers one-on-one solar planning consultations. The couple posts new videos every Sunday and Wednesday on their YouTube channel, TnT Homesteading.

Signature Talks

No. 01 **DIY Off-Grid Solar 101: What I wish I knew before I started**

Living 100% off-grid full-time, I cut through technical jargon and online confusion to give audiences an honest, practical guide to DIY solar. Attendees will learn how to accurately calculate real energy needs, choose the right batteries and charge controllers, size wiring safely, and avoid expensive trial-and-error mistakes. Ideal for homesteaders, cabin owners, and anyone looking to build a reliable power system with confidence, or a backup for important aspects of their home.

No. 02 **Off-Grid Living: Power, Water, & Daily Life**

You want to live off-grid? We love it, but it’s not for everyone. Living 100% off-grid full-time, I share an honest, practical look at what daily life is really like. We’ll cover the core realities of off-grid systems—including rainwater catchment, solar power, cooking, hot showers, and toilet options. Learn what it truly takes to build and sustain a practical off-grid setup.

No. 03 **Tiny Living: So you want to downsize?**

We moved from 1,600 sq ft to under 400 sq ft off-grid in the woods. Tiny living takes downsizing to a whole new level! Learn practical strategies for purging, organizing, multi-use furniture, and changing how you shop. Discover what you really need, what to let go of, and the shocking freedom that comes with letting go of the clutter to live with intent.
